WEATHER OF CONCERN

Weather of Concern

- A strong offshore flow event is expected to promote periods of gusty east winds and low relative humidity across Northern California on Monday 10/09/17.
- High fire danger across portions of Northern California through Monday, 10/09/17 due to gusty north to east wind and low humidity.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

*** "High Risk" Significant Fire Potential today for areas west of the Cascade/ Sierra crest due to strong, gusty N to E winds/low relative humidity (RH); Winds diminishing this afternoon/evening ***

*** More "High Risk" conditions for (less strong) N wind and low RH Wednesday in the Sacramento Valley/Foothills area ***

*** Very dry air mass will linger over much of Northern California for the next week ***

High pressure through the Pacific NW will move far enough east today to cause a rather quick drop in wind speeds by early afternoon for areas west of the Cascade/Sierra crest. "High Risk" of Significant Fire Potential remains in place for many areas west of the Cascade/ Sierra crest today, specifically the Sacramento Valley/Foothills (NC05), Mid Coast (NC02), North Coast (NC01) and Diablo-Santa Cruz Mountains (NC03B) predictive service areas (PSAs). Wind speeds early today will still be quite strong (mostly 10-22 mph with gusts 30-45 mph, locally near 50 mph), but will quickly be diminishing as the morning wears on. Areas east of the crest will continue to have some gusty E to SE winds this afternoon and evening at around 8-15 mph with gusts 20-30 mph. Low RH (8-18%) and poor overnight recovery (less than 30% some places) will occur today in many areas, even for some locations without much wind.

A low pressure trough will arrive off shore later Tuesday then move inland and linger for the latter half of the week. Some gusty S to SW winds will develop Tuesday afternoon near and east of the Cascade/Sierra crest, but when the trough moves a bit further inland Wednesday, more moderately strong, gusty north wind is expected to develop in the Sacramento Valley/Foothills area leading to a marginal "High Risk" Significant Fire Potential situation returning there with lighter winds than we have now but just as low RH. The incoming trough will be dry, but our northern areas at least will see RH increase quite a bit while the southern half of the region remains quite dry. All areas will have low RH over the weekend as the air mass over the region remains/becomes very dry.

The warmest inland areas will be near 80 for the next few days and then mostly into the low to mid 70s Wednesday through Friday. Temperatures there will warm rapidly back to around 80 for the weekend.

SOUTHERN CALIFORNIA

Strong offshore winds through this afternoon

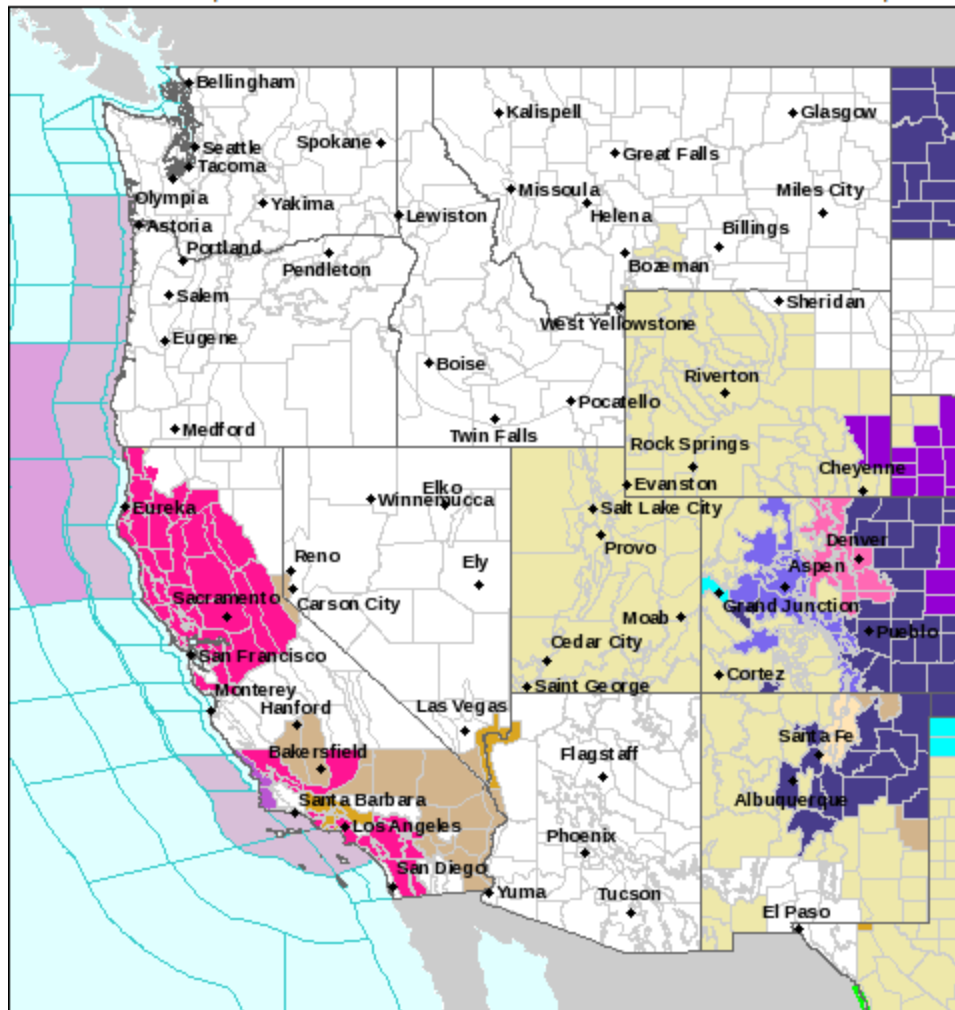

Very dry through Tuesday

Strong surface high pressure over the Great Basin will bring northeast winds of 20 to 40 mph with gusts to 60 mph to the mountains and below the canyons and passes of Southern California through this afternoon. Winds will decrease this evening and become light by Tuesday morning. Minimum humidity will be in the single digits and teens through Tuesday. There will be poor humidity recovery tonight. A weak ridge of high pressure aloft over California will bring a little above normal temperatures to the valleys through Tuesday, with upper 70s and 80s. Temperatures will cool to the mid 50s to mid 60s over the mountains today and then warm to the mid 60s to mid 70s Tuesday as winds become light.

A Pacific trough will move into the West Coast bringing a cooling trend and an increase in humidity Wednesday through Friday. Westerly winds of 15 to 25 mph with gusts to 40 mph will surface across the mountain ridges and desert passes Wednesday morning through Friday afternoon. A strong ridge of high pressure aloft will build northward out of Mexico bringing a warming trend and low humidity to the region Saturday through early next week. There will be north winds of 20 to 30 mph with gusts to 50 mph over much of Santa Barbara County and the Grapevine Friday night. Winds will become northeast 15 to 25 mph with gusts to 40 mph Saturday morning through Saturday afternoon across the mountains and below the canyons and passes of Southern California. Winds will be light Saturday night through early next week.

Cal OES LAW ENFORCEMENT MISSIONS

Cal OES Law Missions

- **2017-LAW-39242, AFRCC# 17M0803A, 10/8/17 @ 1745 Hours,** The El Dorado County Sheriff's Office contacted the Warning Center for support in a rescue effort on Mt. Tallac, 38.89551800 N / 120.090845 W. A 58 year old female had called via her cellular phone and advised that she had broken her leg and was without provisions for an overnight stay at approximately 9,000' elevation. The El Dorado Sheriff's Office requested a helicopter with hoist and night vision capabilities for rescue operations. LDO contacted AFRCC and a National Guard Helicopter from Mather was dispatched to the incident. At approximately 2100 hours the California Air National Guard arrived on scene and began operations. **UPDATE, at 2310 hours,** the Cal OES LDO was advised that the mission had been completed successfully and the female patient had been transported to the hospital. **Mission Closed.**
- **2017-LAW-39228, 10/07/17, 2326 hours:** The International Emergency Response Coordination Center (IERCC) reported and inReach activation on the east side of Mt. Humphrey, Inyo County. Upon contact with Inyo County, it was learned that the IERCC had already contacted them and they were acting upon it. The subject had cell reception and contact with him had been made by Inyo County. He reported to be uninjured, but had slid down onto a ledge and was unable to extract himself. Inyo County was sending ground troops in to evaluate and possibly utilize the California Highway Patrol's helicopter at first light. No mutual aid requests from Inyo County were received. **UPDATE, 10/8/17 at 1500 Hours,** California Highway Patrol's helicopter (H-40) was utilized to extract the subject and delivered him to safety. **Mission Closed.**
